

cross-border student exchange program

What?

A week long exchange program based on the AquaLoop project pilots, hands on experience, laboratory work, study trip, cross-border cooperation and networking.

For whom?

Aquaculture (and related majors: biology, marine biology, etc.) undergraduate and graduate students from the AquaLoop project partner universities: University of Rostock, University of Gdańsk, and Klaipeda University.

Why?

To get familiar with AquaLoop pilots, circular economy practices in aquaculture, partner institutions, and students from Germany, Poland and Lithuania.

When?

January – March 2025

Where?

University of Rostock (DE)
University of Gdańsk (PL)
Klaipeda University (LT)

Pilot 1: Testing Algae Applications in Recirculating aquaculture systems (RAS) to improve aquaculture circularity potential in the SB region, University of Gdańsk

Pilot 2: Increasing the nutrient efficiency of commercial aquaculture through increased application of circular economy concepts, University of Rostock

Pilot 3: Development of the Fish-Shrimp-Vegetables integrated system of aquaponics to showcase the potential of circular economy principles in RAS, Klaipeda University

Are you enthusiastic about circular economy & aquaculture, and you study at one of the AquaLoop project universities? **Then, the program is for you!**
