Post

Isabelle Taylor
14 days ago

Dear Ocean Scientists,

I am a fashion designer (recent masters graduate from The Royal College of Art) that specialises in creating textiles for fashion from fish waste, collected from local fishmongers. My work has been featured in places like The Guardian, ITV News and BBC.

I'm looking to partner with an ocean scientist(s) on a collaborative project for the European Marine Board Artist-in-Residence Programme 'EMBracing the Ocean' (application deadline 16th Feb).

For this residency I would love to research the potential of marine collagen for fabrics, along with the use of scales and fish leather/fibres. However, depending on what you are working on I'm keen to adapt my work to explore and fit your needs for your line of research.

Please get in touch if you are interested!
